

# Is Your Business Hybrid Secure?

Following a shift to remote working over the last couple of years, the future for many organisations looks hybrid. However, despite the benefits of this flexible model, free movement between the home and office can pose significant security threats.

Follow our simple steps to help your business and employees always remain secure and compliant in a hybrid world of work.

## HOME TO OFFICE

# 55%

of organisations around the world offer opportunities for remote work. <sup>1</sup>Ensure that you have adapted your policies for hybrid working to avoid confusion and reduce risks.

## CONFIDENTIAL INFORMATION

# 88%

of home workers deal with confidential information. <sup>2</sup> Make sure that all confidential files, that are no longer needed, are regularly and securely destroyed.

## SHRED-IT ALL POLICY

# 40%

of data breaches worldwide occur due to employee negligence. <sup>3</sup> A Shred-it All Policy helps ensure that the documents you no longer need are destroyed securely, helping prevent data leaks.

## COST OF HYBRID WORKING

# 97%

of businesses surveyed purchased new laptops due to hybrid working. <sup>5</sup> Protect data on old and unused devices by securely shredding hard drives.

## CYBERSECURITY EDUCATION AND AWARENESS

# 39%

of European businesses reported suffering from a cyber-attack in 2021. <sup>4</sup> Be aware of cyber-crime: encrypt data, limit access to confidential information and remove an employee's access rights when they leave the business.
