Secure recycling and data security: why they go hand-in-hand

Paper documents can pose a significant risk to data security and the environment.

10 million tonnes of paper used in the UK each year¹ This is where safe paper shredding and recycling comes in as an essential component of both **data security** and **sustainability**. It is a **safe, secure and environmentally friendly** way to dispose of sensitive information.

Discover the best of both worlds:

Reduced risk of data breaches

Shredded paper is:

Pulped

Turned into new products, such as packaging and tissue.

Sustainable

Recycling one tonne of paper can save²:

26,500 litres of water

Shred-

A Stericycle[®] Solution

4,000 kWh of electricity ;o: 2.3 m³ of landfill

1 billion pounds³

of paper shredded and recycled by Shred-it

By securely shredding and recycling paper, businesses can help ensure the **security** of confidential information while also contributing to a more **sustainable** future. Companies can then help to reduce energy and water use, lower greenhouse gas emissions and make a positive impact on the environment.

Contact us today to see how we can help you both safeguard your customers' confidential information and achieve your sustainability goals: **0800 197 1164** or visit **shredit.co.uk**

We protect what matters.
