DOES YOUR ORGANISATION PRODUCE CONFIDENTIAL INFORMATION?

Warning! All organisations produce confidential information. Even basic information that may not seem confidential could be harmful when falling into the wrong hands.

A Shred-it All policy ensures that the decision to destroy is taken out of the hands of individual employees and can minimise the risk of a data breach.

Knowing which information is confidential is important to maintain a strong information security programme.

Are you aware which information is confidential and when and how to dispose of it?

Warning! It's vital that you undertake training on information security policies and procedures to protect your organisation's confidential information.

PAPER

Where do your employees primarily work?

HOME

OFFICE

Many businesses now opt for a flexible working model, but free movement between the home and office can pose significant security threats. Whether you are working from home or are based in the office, you need to ensure that your business's confidential information remains secure and protected.

31%

OF CONSUMERS would lose trust in a company that experiences a data breach.**

45%

OF SMALL BUSINESS OWNERS say that no policy exists for storing and disposing of confidential information when employees are working off-site.**

83%

OF SMALL BUSINESS OWNERS have no policy for disposing of electronic media such as hard drives and digital information.**
